

Hardcopy Guide for Gathering Input Values for the Home Energy Saver Website <http://hes.lbl.gov>

The following pages contain screen captures that look more or less as they will appear when you go through the on-line version of the Home Energy Saver web site.

Print this worksheet ahead of time and use it at your leisure to gather information to enter into the website during your session.

Many of the input questions have supporting help screens, which can be reached by clicking on the [blue hyperlink](#) on the live site. In many cases, there is a discrete list of choices, which you will be able to see when you click on the “popup” arrow on the live site. In some cases, we have reproduced those lists here.

The screenshot shows the Home Energy Saver website. At the top, a green banner reads "HOME ENERGY SAVER" in white, with a subtitle "The first web-based do-it-yourself energy audit tool" in white on a dark purple background. Below this is a navigation menu on the left with links: "About this Site", "What's New?", "Testimonials", "Librarian", "Glossary", "FAQ", "Ask An Expert", "No/Low-Cost Tips", "Remodeling", "Local Resources", "Awards & Accolades", "Press Information", "Demo Movie", "Developers", "Students & Teachers", "Search", and "Help". The main content area features a large image of a house with the words "ENERGY EFFICIENCY" overlaid. Below the image, text reads: "Investing in a home on your street could be more profitable than investing on Wall Street." and "MAKING IT HAPPEN Find resources to make your home more energy efficient." To the right of the main content is a "CALCULATOR" section with the text "Find the best ways to save energy in YOUR home!". It includes input fields for "Enter your zip code" (with "94720" entered) and "Enter previous session" (with "save" entered). A "Go!" button is below these fields, and a link "Don't know the zip code?" is at the bottom. A yellow callout box points to the "Go!" button with the text "Start here by simply entering your zip code". Above the calculator, a green callout box says "Save \$\$\$ Find out more about the profitability of energy efficiency upgrades". At the top right, a red callout box says "Click here to give us your feedback and help us to improve this site." At the bottom of the main content area, a grey box contains the text: "Money isn't all you save. Visit the ENERGY STAR website for information on energy-efficient products."

Energy Bill for Houses in Berkeley, California

Based on the zip code you entered, here is a comparison of the energy costs (in \$/year) of an average home and an energy-efficient home in your area.

■ Heating ■ Cooling ■ Water Heating ■ Major Appliances ■ Lighting ■ Small Appliances

[See greenhouse gas emissions and energy consumption](#)

[What should I do next?](#)

Potential Savings
\$395

[About the Results](#)

This list of options is at the top of every page in the calculator area. The following sheets in this handout show the input forms you will reach by clicking on these categories.

OPTIONS

- Slab-on-grade foundation
- Unconditioned basement
- Conditioned basement
- Unvented crawlspace
- Vented crawlspace

After entering your zip code, you will see some preliminary results for typical homes in your area, followed by this list of questions.

These are preliminary questions that will help you customize the results to reflect your particular house.

More details can be entered by clicking on the categories at the top of this page (e.g. General Info, Heating & Cooling, Water Heating, etc...).

This further level of detail is optional. The more categories you select and complete, the more accurately the results will reflect the conditions in your home.

Find this information on your energy bills.

You can enter either the average, or (for electricity only) the exact tariff you have.

Start Calculation...

1. Which city has the most similar climate to your house?
2. Year your house was built:
3. What is the conditioned floor area: sq. ft.
4. How many [stories above ground level](#) are there?
5. The [front of your house](#) faces:
6. What [type of foundation](#) does your house have?
7. How much [attic floor or roof insulation](#) do you have?
8. Does your house have wall insulation? ☐ Yes ☒ No/Don't Know
9. Does your house have [foundation or floor insulation](#)? ☐ Yes ☒ No/Don't Know
10. Do you have a clothes washer? ☒ Have ☐ Don't Have
11. How many refrigerators do you have?
12. How many freezers do you have?
13. What is your water heater fuel?
14. What kind of [heating equipment](#) do you have?
15. What kind of [cooling equipment](#) do you have?
16. Starting with the front of your house, how many windows are on each (Assume each window is 12 square feet)
Front: Left: Back: Right:
17. What price do you pay for your energy?

(Consult your utility bills to update the statewide averages shown below)

For electricity prices, you may either use the statewide average, or select an electricity tariff)

Electricity

☒ Use average price per kWh
 \$/kilowatt-hour

☐ Select an electricity tariff
(Click Save, a new page will open with a list of utilities)

Piped Natural Gas \$/therm or \$/100 cubic foot

Liquid Propane Gas \$/gallon

Fuel Oil \$/gallon

See "Heating & Cooling Equipment" screen (below) for options

General Information

Save Answers

What city has the most similar climate to your location:

Year house was built?

Number of Occupants

Ages 0 to 5 Ages 6 to 13 Ages 14 to 64 Ages 64 and up

We offer nearly 300 locations from which to choose around the United States. If your town is not available, select one that you believe to have similar weather conditions.

House Shape and Size

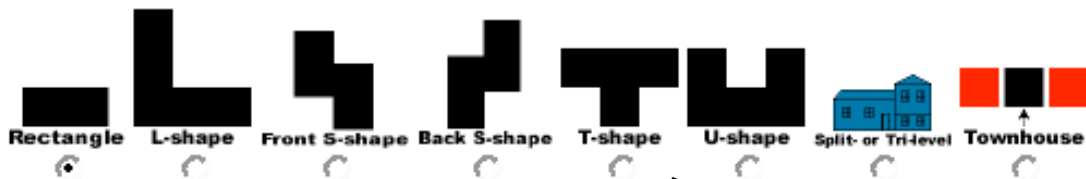

Save Answers

1. The front of the house faces in which direction?

2. How many stories above ground level does your house have?

3. What is the interior floor-to-ceiling height?

4. Choose the shape below that most closely matches the shape of your house:
Imagine your house's shape without attached garages

If your house is rectangular, please answer the next two questions:

5. What is the length of the house (from front to back)?

Enter a value between 10.00 and 200.00 feet

6. What is the width of the house (from left to right)?

Enter a value between 10.00 and 200.00 feet

6 to 20 feet, in 1-foot increments

If you choose something other than a rectangle, you will see a subsequent screen that will ask you to enter the dimensions (in feet) for the various edges of your house

Exterior Shading

Save Answers

Enter the appropriate information for each side of the house:

	Front	Right	Back	Left
1. <u>Extension of roof eaves</u> or patios (between 0.50 and 20.00 feet)	<input type="text" value="1"/> feet	<input type="text" value="1"/> feet	<input type="text" value="1"/> feet	<input type="text" value="1"/> feet
2. Height of <u>large shade trees</u> (greater than 6 ft.)	<input type="text" value="0"/> feet	<input type="text" value="0"/> feet	<input type="text" value="0"/> feet	<input type="text" value="0"/> feet
3. Height of <u>neighboring houses</u>	<input type="text" value="None"/> stories	<input type="text" value="None"/> stories	<input type="text" value="None"/> stories	<input type="text" value="None"/> stories

1 to 4 stories

Airtightness

Save Answers

1. Does the house have weatherstripping and/or caulking to prevent air leakage? Yes ☐ No ☒ ?

2. Enter the measured or estimated air leakage rate into and out of house (optional)
(0.00 to 25000.00)

Foundations and Floors

Save Answers

1. What is your house's [foundation type](#)?

2. What is the [foundation insulation level](#)?

If your home has either a basement or a crawlspace answer the next question:

3. What is the [insulation level](#) of the floor above the basement or crawlspace?

OPTIONS

- Slab on grade
- Unconditioned basement
- Conditioned basement
- Unvented crawlspace
- Vented crawlspace

None, R-5,
R-11, or R-
19

R-0 to R-

R-0 (no insulation)	<input type="radio"/>				

1a. Do all the wall have similar construction? ☒ Yes ☐ No

Selecting "Yes" sets all the walls to the type chosen above. If you select "No" we will ask about the other walls on the next page.

2. How dark are the exterior surfaces of the walls?

Doors and Windows

Save Answers

Doors

1. Front of House

[Number of doors on each wall](#) (1-4)

Door type (Core/Edge/Frame Type)

Door U-Factor (Optional) (0.00 to 5.00) Btu/h-ft²-°F

To calculate with U-factor, be certain to select "custom door" as your door type.

Right Side of House

[Number of doors on each wall](#) (1-4)

Door type (Core/Edge/Frame Type)

Door U-Factor (Optional) (0.00 to 5.00) Btu/h-ft²-°F

To calculate with U-factor, be certain to select "custom door" as your door type.

Back of House

[Number of doors on each wall](#) (1-4)

Door type (Core/Edge/Frame Type)

Door U-Factor (Optional) (0.00 to 5.00) Btu/h-ft²-°F

To calculate with U-factor, be certain to select "custom door" as your door type.

Left Side of House

[Number of doors on each wall](#) (1-4)

Door type (Core/Edge/Frame Type)

Door U-Factor (Optional) (0.00 to 5.00) Btu/h-ft²-°F

To calculate with U-factor, be certain to select "custom door" as your door type.

"Front" will correspond to the direction you say the house is facing on the "House Shape and Size" input screen.

The "U" factor is "1" divided by the "R-value". Information on U-factors and R-values is available from the door manufacturer.

Windows

	Front	Right	Back	Left
3. Window Area (0.00-300.00 square feet)	72 square feet	36 square feet	72 square feet	36 square feet
4. Movable window insulation (R-value 0.0-12.0)	0	0	0	0

5. [Movable window shades](#)

Front:

Right:

Back:

Left:

6. [Window type](#) (Select one)

a) Does the house have more than one type of window? No ☒ Yes ☐

Selecting "No" sets all windows to the type chosen below. If you select "Yes" we will ask about the other windows on the next page.

Glazing Type	Frame Type		
	Aluminum	Aluminum w/ Thermal Break	Wood or Vinyl
Single-pane, clear	<input checked="" type="radio"/>		<input type="radio"/>
Single-pane, tinted	<input type="radio"/>		<input type="radio"/>
Double-pane, clear	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Double-pane, tinted	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Double-pane, solar-control low-E	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Double-pane, solar-control low-E, argon gas fill			<input type="radio"/>
Double-pane, insulating low-E			<input type="radio"/>
Double-pane, insulating low-E, argon gas fill		<input type="radio"/>	<input type="radio"/>
Triple-pane, insulating low-E, argon gas fill			<input type="radio"/>
<input checked="" type="radio"/> Custom window Enter your own specifications using fields at right.	<div>U-Factor (0.00:5.00)</div> <div>Solar heat gain coefficient (0.00:1.00)</div>		

These areas (in square feet) are the COMBINED areas of all windows on each side of the house. For example, if you have 4 windows that are each 2 feet tall by 4 feet wide, the area to enter is 4 x (2 x 4), or 32 square feet.

When buying a new window, it will probably come with a label that provides these values.

Skylights

Save Answers

NOTE: Answer the next four questions ONLY if the house has skylights.

1. What is the area of the skylights? square feet

Enter a value between 0.00 and 300.00 square feet. Multiply the length of each skylight by its width, such as 3.50 feet X 2.00 feet, and add these individual areas to obtain the total skylight. Include skylight frames in your calculation.

2. Please select your skylight type:

Glazing Type	Frame Type		
	Aluminum	Aluminum w/Thermal Break	Wood or Vinyl
Single-pane, clear	<input type="radio"/>		<input type="radio"/>
Single-pane, tinted	<input type="radio"/>		
Double-pane, clear	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Double-pane, tinted	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Double-pane, solar-control low-E	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Double-pane, solar-control low-E, argon gas fill			<input type="radio"/>
Double-pane, insulating low-E			<input type="radio"/>
Double-pane, insulating low-E, argon gas fill		<input type="radio"/>	<input type="radio"/>
Triple-pane, insulating low-E, argon gas fill			<input type="radio"/>
<input type="radio"/> Custom skylight Enter details in text fields at right	<input type="text" value="0"/> Skylight U-factor Enter a U-factor between 0.0 and 5.0. <input type="text" value="0"/> Skylight solar heat gain coefficient Valid coefficients are between 0.0 and 1.0.		

When buying a new skylight, it will probably come with a label that provides these values.

3. Enter the R-value of movable skylight insulation:

Enter an R-value between 0.0 and 12.0. Enter 0.0 if you have no movable skylight insulation.

4. Select the type of movable interior skylight shades (if applicable):

Attic and Roof

Save Answers

1. Select the [attic or ceiling type](#):

If your house has an attic, answer the next question:

2. What is the [insulation level of the attic floor](#):

3. Insulation level (e.g. [in a cathedral ceiling, or sheath insulation under the roofing materials](#)) and exterior covering of the roof or cathedral ceiling:

Roof Insulation Level (not attic floor)	Exterior Covering				
	Composition Shingles	Wood Shakes	Clay Tile	Concrete Tile	Tar and Gravel
R-0 (no insulation)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
R-11 (3-5 inches)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
R-13 (5-6 inches)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
R-15 (6-7 inches)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
R-19 (7-9 inches)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
R-21 (9-10 inches)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
R-27 (10-13 inches)	-	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
With Radiant Barrier					
R-0 (no insulation)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
With EPS Sheathing					
R-0 (no insulation)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
R-11 (3-5 inches)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
R-13 (5-6 inches)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
R-15 (6-7 inches)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
R-19 (7-9 inches)	-	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
R-21 (9-10 inches)	-	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

4. How [dark is the exterior surface](#) of the roof or cathedral ceiling?

☐ Select from Menu

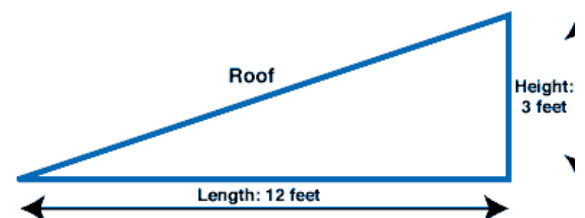

☐ User-entered exterior roof absorptance

Enter a value between 0.00 and 1.00.

5. What is the [slope \(or pitch\)](#) of your roof?

(In the form height:length)

Ex. 0:12 = flat roof; 12:12 = 45 degree slope

Ducts

Save Answers

NOTE: Answer the next three questions ONLY if your house has forced-air heating or cooling ducts.

Where are your ducts located? Unconditioned attic

Are the ducts insulated? ☒ Yes ☐ No/Don't Know

Are the ducts sealed? ☐ Yes ☒ No/Don't Know

If only sealed with duct tape, answer "no"

Boiler Details

NOTE: Answer the next questions ONLY if the home has boiler pipes.

Are the boiler pipes insulated? ☐ Yes ☒ No/Don't Know

Does your [boiler provide the hot water](#) for your house? No - I have a separate boiler and water heater

OPTIONS

- Conditioned (heated/cooled) space
- Unconditioned basement or unvented crawlspace
- Vented crawlspace
- Unconditioned attic
- Unknown

OPTIONS

- No, I have a separate boiler and water heater
- Combination boiler and water heater with tankless coil for water heating
- Combination boiler with indirect tank for water heating

Thermostat

Save Answers

1. What is your thermostat type? Standard ☒ or Programmable ☐

2. Do you use more than one temperature setting (each) for heating and cooling? ☐ I change the settings ☒ I leave it the same
(e.g. two settings, one for heating and one for cooling, or more than two)

Standard Thermostat Schedule

Save Answers

Settings for a house with a standard thermostat:

T.2. Start times and temperatures at which the thermostat is set:

Enter values between 40 and 100 degrees F for the temperatures.

Enter whole-hour values between 1 and 24 hours for the start times. Use 24 hour clock or military time (12 = noon; 24 = midnight). Each succeeding thermostat setting period must begin at least one hour after previous period (e.g., if the "Daytime" setting starts at 8, the "Nighttime" setting must start no earlier than 9).

	Weekdays			
	Daytime		Nighttime	
Heating:	64	degrees F, 8 Time	68	degrees F, 17 Time
Cooling:	81	degrees F, 8 Time	78	degrees F, 17 Time
	Weekends & holidays			
	Daytime		Nighttime	
Heating:	64	degrees F, 8 Time	68	degrees F, 17 Time
Cooling:	81	degrees F, 8 Time	78	degrees F, 17 Time

If you select a "Programmable" thermostat in the previous screen, and indicate that you change the settings, you will be taken to this screen where you should enter the heating and cooling schedule and temperatures that you've programmed into the thermostat.

Can usually be found on the heating equipment label

OPTIONS

- None
- Central gas furnace
- Room (through-the-wall) gas furnace
- Propane (LPG) furnace
- Oil furnace
- Electric furnace
- Electric heat pump
- Electric baseboard heater
- Gas boiler
- Oil boiler

Heating Equipment

Save Answers

NOTE: To complete the heating and cooling system description, be sure to visit the Ducts and Thermostat pages.

1. Please select your [heating system](#):

2. What is your [heating system capacity](#)? Btu/hour

Enter a value between 1,000 and 400,000 Btu/hour. Do not use a comma in your entry.

If you are uncertain of the equipment capacity, enter 0 and the calculator will automatically size your equipment to meet the heating demand.

3. If you [know](#) the heating system [efficiency](#), enter it here: %

OR What year was your heating system installed?

NOTE: Selecting a year installed will overwrite the efficiency value entered above with a representative value for systems sold in that year.

4. [Percentage of the house's floor area](#) heated by a central or room heating system: %

Enter a value between 0 and 100%. Exclude wood stoves and portable heaters.

5. Percentage of the house's [heating needs](#) supplied by a wood burning stove or portable heater: %

Enter a value between 0 and 100%.

This can be estimated by dividing the "Output BTUs" by the "Input BTUs", usually noted on the equipment label.

Can usually be found on the heating equipment label

OPTIONS

- None
- Central air conditioner
- Room air conditioner

Cooling Equipment

Save Answers

NOTE: To complete the heating and cooling system description, be sure to visit the Ducts and Thermostat pages.

1. What type of [cooling equipment](#) do you have?

2. What is the [capacity](#) of your cooling equipment? Btu/hour

Enter a value between 1,000 and 400,000 Btu/hour. Do **not** use a comma in your entry.

If you are uncertain of the equipment capacity, enter 0 and the calculator will automatically size your equipment to meet the cooling demand.

3. If you [know](#) the cooling system [efficiency](#), enter it here:

OR What year was your cooling system installed?

NOTE: Selecting a year installed will overwrite the efficiency value entered above with a representative value for systems sold in that year.

4. [Percentage of the house's floor area](#) cooled by the cooling system: %

Enter a value between 0 and 100%.

NOTE: Answer the next two questions ONLY if the home has a Room (vs. central) Cooling System

5. [Hours room air conditioner is on](#) during an average day in the cooling season:

6. [Number of months](#) room air conditioner is on during an average cooling season:

7. Does the house have ceiling fans? ☒ Yes ☐ No

8. Number of ceiling fans:

9. Does the house have a [whole house fan](#)? ☐ Yes ☒ No

10. [Hours per day the whole house fan is used](#):

11. [Months per year the whole house fan is used](#):

12. Does the house have portable fans? ☐ Yes ☒ No

13. Number of portable fans:

NOTE: To complete the heating and cooling system description, be sure to visit the Ducts and Thermostat pages.

Cooking and Dishwasher

Save Answers

Clothes Washer:

Do you have/use a clothes washer? ☒ Yes ☐ No

Is it an EnergyStar clothes washer? ☐ Yes ☒ No

How many loads per week do you wash? 7

How many of your weekly loads are washed/rinsed at the following temperatures?

2	Hot /Warm
0	Hot /Cold
3	Warm /Warm
2	Warm /Cold
0	Cold /Cold

Clothes Dryer:

What fuel does your clothes dryer use? Electricity

How many loads per week do you dry? 7

OPTIONS

- Don't have/don't use
- Natural Gas or Propane
- Electricity

Lighting

Option 1: Based on the information you supply about the number of lighting fixtures, we can estimate the energy used by lights. This estimate will be based on typical hours of use and wattage from a field study that monitored lighting in homes.

Option 2: If you prefer, you can provide the exact wattage and average hours of use per day for each fixture. This information will then be used to calculate lighting energy use. It will probably take you a few minutes to collect the wattage for each fixture.

[Save answers...](#)

How many light fixtures do you have in the following rooms (include portable (plug-in) lamps): Note: Multiple lights on a single circuit (switch) count as one fixture.

Kitchen	2	Dining Room	1	Living Room	3
Family Room	1	Master Bedroom	2	Hall	2
Bedroom(s) (enter the total for all other bedrooms, excluding closet lights)	2	Bathroom(s) (enter the total for all bathrooms)	2	Closet(s) (enter the total for all closets)	0
Utility Room	0	Garage	1	Outdoor Lighting	2
Other	0				

Detailed Lighting Inputs

[Calculate Detailed Lighting Usage](#)

Use the detailed inputs below to estimate your home's lighting costs.

Please enter information about your lighting fixtures in the table below. Complete one row for each fixture. Multiple lights controlled by one switch or set of switches is considered one fixture. The inputs you enter here will be used to calculate the lighting energy for your house.

You may find it helpful to print this table and carry it around the house to collect fixture wattages and record your estimates of fixture usage. If you forgot a fixture, go back to the previous page and add it there (inputted data on this page will not be saved), or combine it with a similar fixture already present in the table below. Combining it with a fixture in the same room will keep the summary of energy usage/per room consistent with your house, combining the missing fixture with a fixture in another room will alter this balance.

When estimating lighting usage, don't forget to factor in vacations and other times when the room or house is unoccupied. People tend to overestimate lighting usage for this reason. If you are not sure how a particular fixture is used, leave the default value - it is based on the field study mentioned on the previous page and is a good estimate of average usage for that room.

Fixture Location	Bulb Type	Number of bulbs in fixture	Sum of wattages for all bulbs in fixture	Usage (Hrs/day)
Kitchen	<input checked="" type="radio"/> Incandescent <input type="radio"/> Halogen Torchiere <input type="radio"/> Compact Fluorescent <input type="radio"/> Fluorescent tubes	1	95	3
Kitchen	<input checked="" type="radio"/> Incandescent <input type="radio"/> Halogen Torchiere <input type="radio"/> Compact Fluorescent <input type="radio"/> Fluorescent tubes	1	95	3
Dining Room	<input checked="" type="radio"/> Incandescent <input type="radio"/> Halogen Torchiere <input type="radio"/> Compact Fluorescent <input type="radio"/> Fluorescent tubes	1	165	2
	<input checked="" type="radio"/> Incandescent <input type="radio"/> Halogen Torchiere <input type="radio"/> Compact Fluorescent <input type="radio"/> Fluorescent tubes			

If you choose "Option 1" in the first Lighting question, the following table will appear, with one row for each room and light fixture indicated in the first table.

Refrigerators and Freezers

Save Answers

First Refrigerator:

What year was your refrigerator made? 1990 ▼

What size is this refrigerator? Large (19–21 cu ft) ▼

What kind of refrigerator is it? Don't know details ▼

Is it an EnergyStar refrigerator? ☐ Yes ☒ No

Second Refrigerator:

What year was your 2nd refrigerator made? 1972 ▼

What size is this refrigerator? Small (13–15 cu ft) ▼

What kind of refrigerator is it? I don't have a 2nd refrigerator ▼

Is it an EnergyStar refrigerator? ☐ Yes ☒ No

Third Refrigerator:

What year was your 3rd refrigerator made? 1972 ▼

What size is this refrigerator? Small (13–15 cu ft) ▼

What kind of refrigerator is it? I don't have a 3rd refrigerator ▼

Is it an EnergyStar refrigerator? ☐ Yes ☒ No

First Freezer:

What year was your freezer made? 1972 ▼

What size is this freezer? Small (13–15 cu ft) ▼

What kind of freezer is it? I don't have a freezer ▼

Second Freezer:

What year was your 2nd freezer made? 1972 ▼

What size is this freezer? Small (13–15 cu ft) ▼

What kind of freezer is it? I don't have a 2nd freezer ▼

These four screens list a large number of common “small” appliances, organized by type of use (e.g. “Entertainment”). On the last of these four pages is an option to create a custom appliance, if you have something not shown on this page. The more accurately and completely you answer these questions, the more accurate will be your estimated energy use.

OPTIONS
0 to 24
hours, in 1-
hour
increments

☐ Pool Pump

0 ▾ How many hours/day does your pool pump run?

0 ▾ How many months of the year does your pool pump run?

Do you have a Pool heater ☐ Yes ☒ No

Spa/Hot Tub

I don't have a spa

0 ▾ If you heat your spa only when it is being used, how many hours/week do you use your spa?

OPTIONS

- I don't have a spa
- Spa is heated 24 hours per day with electricity
- Spa is heated 24 hours per day with gas
- Spa is heated only during use with electricity
- Spa is heated only during use with gas

☐ Sump/Sewage Pump

What is the size of your sump pump? 1/3 horsepower ▾

How many hours/year does your sump operate? 25 hours/year ▾

Well Pump

Indicate the vertical distance that water is lifted - 175 ▾ feet
(Depth of well plus any additional height above wellhead/ground to get to the house).

Combined Pump and Motor Efficiency Typical - 40% ▾

Is house water pressure provided by gravity or pump? ☐ Gravity ☒ Pump

How much water is used outdoors?

Roughly 1.25 hours/day with garden hose ▾

50 to 1000 feet, in
50-foot increments

OPTIONS

- 1/6 horsepower
- 1/10 horsepower
- 1/3 horsepower
- 1/2 horsepower

OPTIONS

- Typical: 40%
- Efficient: 60%

OPTIONS

5 minutes to 3.5 hours
per day, with garden
hose
